

Template Agreement

We request that the following steps be completed prior to our techs arrival to allow for a successful templating process.

Existing countertops are clear - When measuring existing counters, the entire surface must be cleared off to guarantee accurate measurements.

Cabinets are installed and level - All cabinet work that can affect final dimensions must be completed. Cabinets must be structurally sound, plumb and, level and secured to the wall and /or floor. Cabinets must be level within 1/8-inch over 10 feet.

Adequate support - The material type and thickness dictate the amount of overhang permitted on a countertop. Some overhangs will require corbels or brackets. Corbels must be installed prior to the field template. Overhangs over 12 inches require corbels every 30 inches. New or existing cabinets must be structurally sound and withstand the weight of the countertop.

Sink is on site - If a sink is supplied by the customer, it must be on site for the templating technician to take with to ensure accurate measurements. An undermount farmhouse/apron sink or any style sink requiring installation before the top is installed is the responsibility of the customer and must be installed prior to measure.

Appliances and Miscellaneous - Items to be mounted in the countertops (including items such as sinks, faucets, soap pumps, hot/cold water dispensers, cook tops, etc.) MUST be on the job site prior to the date of the field template. Appliances cut sheets (including dishwashers, stoves, refrigerators, etc.) should be available for reference.

Cut In Stone is not responsible for any errors resulting from the customers or manufacturers specifications. Changes in specifications will not be accepted after field template is complete.

The customer (or designated decision-maker) MUST be present at the time of measuring/templating and be responsible for approving all the details of the countertop. Your designer will provide you with a copy of the drawing including all details, such as color, edge profile, etc. The field template supersedes all previous drawings.

PLEASE VERIFY MATERIAL COLOR, EDGE DETAIL, SINK SELECTION AND ALL MEASUREMENTS WITH YOUR TECHNICIAN WHILE HE/SHE IS ONSITE

Final Pricing- Your initial purchase is an estimate of the projected price of your countertop project. The final price will be determined after the field template has been completed.

Product Information- Countertop color card, samples and literature may vary from the actual countertop material. In addition, please be aware that some countertop colors may require more maintenance. Under ordinary use, dark colors will show dirt, dust, scratches, rubs, fingerprints, and watermarks more readily than lighter colors and patterns. Please be aware that some materials will have natural chips, veins, swirls, and markings that are not a result of fabrication and exclusively due to material type.
